SUMMARY

Full-stack Software Engineer with over **5** years of experience building scalable **web** and **cross-platform applications** using **React**, **TypeScript**, **Next.js**, **ReactNative** and **Electron**. Proven track record of shipping high-impact features at **TikTok** and **Ant Group(Alipay)**, including user-facing mobile components, low-code platforms, and internal AI agent tools. Focused on Agent development with hands-on experience using LangGraph, PocketFlow, and DeerFlow to orchestrate multi-agent workflows and integrate internal tools.

EXPERIENCE

Full-Time Mobile Software Engineer

June 2023 – Present

TikTok Inc.

Los Angeles, CA

- Built and maintained cross-platform mobile components using Swift, Objective-C, and **Lynx**(ReactNative-based framework), including QR Code page, suggestion labels, and user recommendation cards in the TikTok Feed, significantly contributed to user engagement growth.
- Architected and developed an internal AI Code Refactoring Agent using Electron, Vite, React, and Node.js, powered by local LLMs (LLaMA 3.2, DeepSeek-r1). The agent automated Objective-C to Swift migrations, reducing manual engineering effort by over **90%**.
- Created a VSCode extension for Objective-C to Swift migration using TypeScript and reactive-vscode, integrating with the in-house Trae framework to streamline one-click refactoring and improve team productivity.
- Delivered over **30** internal tech talks on Electron, LLM agent workflows, hybrid mobile-web architecture, Mobile development and modular component design, promoting cross-team knowledge sharing and technical alignment.

Full-Stack Software Engineer Internship

May 2022 - Aug 2022

Ansys

Pittsburgh, PA

- Developed and maintained the Twin Deployer App using Python Tornado, TypeScript, Vue, Quasar, Electron, and Swagger to model, simulate, and analyze virtual system prototypes.

Full-Time Full-Stack Software Engineer

Jul 2020 – Jun 2021

Ant Group, Alibaba

Hangzhou, China

- Led the development of a low-code mobile financial content platform within Alipay, enabling over **200** financial institutions to launch over **2 million** mini program apps using **React Native**, **Redux**, **TypeScript**, **Ant Design**.
- Built and maintained scalable backend APIs using **Node.js**, **Egg.js/Koa.js** to support Alipay live, content distribution, payment, coupon and analytics system — powering production traffic across multiple B2B use cases.
- Delivered core live-streaming components for Alipay Financial Live using Birdnest Native and Node.js, contributing to over **\$15B** in financial product sales (funds, FOFs, bonds).
- Implemented and maintained JavaScript Bridge interfaces to enable native API calls from Alipay Mini Programs; resolved critical production issues using packet capture and log-based debugging.
- Collaborated with PMs, mobile engineers, QA, and institutional finance clients to build a financial content ecosystem — including fund recommendation systems, coupon campaigns, and content distribution services — now serving over **100 million** users.

EDUCATION

University of Pittsburgh

Pittsburgh, PA

Master's Degree of Information Science

Aug 2021 - Apr 2023

Southern University of Science and Technology

Shenzhen, China

Bachelor of Computer Science

Sep 2016 - Jun 2020

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Node.js, Python, Swift, Objective-C

Frontend Frameworks: React, Next.js, Redux, TailwindCSS, Ant Design, React Native, Electron, Vite, Lynx

Backend & APIs: Node.js (Koa.js, Egg.js), Express, RESTful APIs, SSR, WebSocket, MongoDB, MySQL, Redis

Tooling & DevOps: Git, Vercel, PM2, Postman, Charles Proxy, VSCode, Cursor, Swagger, Docker

LLM & Agent Tools: LLaMA, DeepSeek, Qwen, LangGraph, PocketFlow, DeerFlow, Trae, Bolt.new, Cursor, GitHub Copilot
